EDUCATION

Indian Institute of Information Technology (IIIT) Bhagalpur: Bachelor of Technology in Computer Science and Engineering
• **GPA:** 8.11 (Absolute Grading) **November 2022 — May 2026 (Expected)**

EXPERIENCE

Evernorth Health Services (Cigna Group) **Hyderabad, Telangana, India**
Software Development Engineer (SDE) Intern **July 2025 — Ongoing**

- **Refactored** a sequential file-processing pipeline into a **decoupled, event-driven architecture** using **Python, AWS (Lambda, SQS, S3), and Kafka**; implemented parallel execution to achieve a **40% reduction** in end-to-end latency.
- **Architected** an automated **OpenSearch disaster recovery system** for 30+ indexes (120GB+), building **Python REST utilities** and S3-on-demand recovery scripts that slashed restoration time from hours to **2 minutes**.
- **Strengthened** release reliability by implementing **blue-green AWS Lambda deployments** and automating **Artifactory-to-S3 (Maven JAR)** publishing via **Terraform**, eliminating manual packaging risks across multi-stage environments.

Neoned71 Tech Solutions **Remote**
C++ Developer Intern **September 2024 – November 2024**

- **Engineered** C++/Qt graph components for **1000+ nodes**; reduced memory footprint by **30%** by refactoring node management with **smart pointers** and **STL containers**, validated via **Valgrind**.
- **Implemented** thread-safe multithreading for autosave and validation using **mutexes** and concurrency primitives, improving UI responsiveness under load.

TECHNICAL SKILLS

Programming: C++, Java, Python, JavaScript, SQL
Full Stack Development: React.js, Node.js, Express.js, RESTful APIs, HTML5, CSS3, Tailwind CSS, Spring Boot
Cloud & DevOps: AWS (EC2, S3, Lambda, Step Functions, OpenSearch, CloudWatch), Terraform, Jenkins, CI/CD
Databases: MySQL, MongoDB, DynamoDB, Firebase
Tools & Technical: Git, GitHub, Linux, Postman, SDLC, System Design (HLD & LLD), Database Design, DSA, OOP
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence (basic)

PROJECTS

Uber-Microservices, Distributed Ride Matching System 🔗

- Engineered a distributed microservices architecture using **Java** and **Spring Boot**, decoupling rider, driver, and matching logic into independent services to improve scalability and maintainability.
- Implemented real-time geospatial driver discovery with **Redis Geo** and asynchronous **Kafka** event streams, enabling low-latency ride matching and location updates.
- Designed ride lifecycle processing and persistent state management using **REST APIs, MySQL, and Docker Compose** for local environment orchestration.

JobLex, Full-Stack Campus Hiring Platform 🔗 🔗

- Constructed a scalable, full-stack job platform using **React.js, Node.js, Express.js, MongoDB, TailwindCSS, and Cloudinary**, with role-based dashboards for students and recruiters.
- Developed mobile-first responsive web application with **planned job post expiration** (reducing outdated listings), **resume uploads, real-time email alerts, and application tracking**, improving efficiency and retention.

ACHIEVEMENTS

Competitive Programming

- **LeetCode & GeeksforGeeks:** Solved **900+ DSA problems** and reached a maximum rating of **1883 (Knight)**.
- **Flipkart GRiD 6.0 (2024):** Secured a position within the top 1 percent of nearly half a million participants. 🏆
- **CodeKaze by Naukri (2024):** AIR **920** out of 100,000+ participants (Top **0.92%**). 🏆

Hackathons

- **HP Power Lab Quarterfinalist (2024):** Top **180 / 130,000+** teams — proposed a solution for remote location delivery 🏆
- **Tata Imagination Challenge (2024):** National Semi-Finalist — Top **0.1%** (7,118 / 312,540). 🏆
